**FOR IMMEDIATE RELEASE**

## ***Fantech Introduces Energy Star Qualified Premium Bath Fans with Fluorescent Lights***

SARASOTA, FLORIDA – The unique design of Fantech’s new Energy Star qualified premium bath fan with fluorescent light (PBI00F) meets the needs of green builders, energy conscious homeowners and the strict requirements of California’s Title 24. It also gives consumers what they really want ... a quiet, effective bath fan.

What’s more, Fantech Premium Bath Fans offer more flexibility at installation. Small ceiling grilles or inlet ports can be positioned at the source of contaminants ... above the shower ... over the toilet... over the whirlpool tub. Moisture, steam and odors are exhausted quickly to protect your home from the harmful effects of mold and mildew. Multiple ports can be used with one fan motor. As with all Fantech Bath Fans, the inline fan motor mounts away from the living area.

The compact 5 1/2” square housing of the ceiling grille housing easily fits between floor joists when mounting unit in a first floor bathroom or powder room. The 7-inch exhaust grille with 14-watt, instant-on, compact fluorescent bulb provides the perfect energy efficient light source.

The PBI00F features a 100 CFM fan and one Ceiling Grille with light. Other models are available with two ceiling grilles and fans up to 360 CFM.

For more information on Fantech’s complete line of Premium Bath Fans and Fan-Lights, visit [www.fantech.net](http://www.fantech.net) or call 1-800-747-1762.
